EDUCATION

Calvin University - Bachelor's Computer Science, Math Minor (May 2026)

- Program of Study GPA: 3.7

PROJECTS

[Custom Javascript FPS Engine](#) | JavaScript, HTML, CSS, Three.js

- Architected and implemented a browser-based 3D game framework supporting rendering, collision handling, AI navigation, animation, and gameplay systems.
- Developed custom collision and movement logic without using a physics engine.
- Implemented graph-based pathfinding for enemy AI navigation and target pursuit.
- Designed reusable gameplay systems for combat, enemy behavior, user input, and game state management.

Senior Project | Angular, Typescript, HTML, CSS, Git, GitHub

- Extended and maintained a four-year-old Angular application developed by previous student teams.
- Implemented automated regression testing using Playwright to improve release reliability.
- Collaborated with stakeholders and teammates to prioritize and deliver requested features.
- Used GitHub Flow and code reviews within a multi-developer development environment.

Adventure Map for GMod | Lua, Hammer Editor, Blender, VTFEdit, Crowbar

- Developed a story-driven multiplayer adventure map featuring scripted events, custom gameplay sequences, and environmental interactions.
- Implemented gameplay logic and level scripting using Lua and Hammer.
- Released publicly and received positive community engagement and user feedback.

Server Plugin/Datapack | Java, in-game scripting language

- Developed a datapack and Java plugin supporting multiplayer minigames and server administration.
- Handled player permissions, queue management, persistent player statistics, multiplayer game orchestration

XLib wrapper | C++, C, XLib

- Designed an object-oriented abstraction layer over XLib to simplify graphics application development.
- Demonstrated it by creating a pair of simple applications

SKILLS

Languages: JavaScript/TypeScript, Python, Java, C++, Lua, SQL

Familiar: C#, C, Ruby, Ada, Clojure

Tools/Frameworks: Git, React, Angular, PostgreSQL, Azure, Bash

Work Experience

Prince Conference Center – Event Setup

January 2023 – May 2026

- Configured audiovisual equipment and room layouts for conferences and events.
- Coordinated with staff and event organizers to meet scheduling requirements.
- Maintained event spaces and assisted with logistical operations.
